Solar Energy System Engineering of Sweden No 1 Middle School

Overview

Can I study solar energy engineering at Dalarna University?

Dalarna University offers students the choice of taking a one- or two-year master's programme in solar energy engineering. The One-Year Master's Programme in Solar Energy Engineering (60 credits) focuses on the needs of the solar industry, and provides you with the essential knowledge and hands-on skills necessary for this professional field.

What is a Master's in solar energy engineering?

The One-Year Master's Programme in Solar Energy Engineering (60 credits) focuses on the needs of the solar industry, and provides you with the essential knowledge and hands-on skills necessary for this professional field. Core courses are in photovoltaics and solar thermal systems, as well as economics with a solar energy focus.

What is a two-year Master's in solar energy engineering?

The Two-Year Master's Programme in Solar Energy Engineering (120 credits) builds on the core courses of the one-year programme and extends them with a number of advanced-level topics in solar engineering. These will broaden your perspective regarding the role of solar energy in local, national, and global energy systems.
