Overview

Hundreds of homes as well as clinics and schools in northern rural Liberia are set to be powered by solar mini-grids – part of a wider electrification drive aimed at bringing a stable electricity supply to thousands more.

Hundreds of homes as well as clinics and schools in northern rural Liberia are set to be powered by solar mini-grids – part of a wider electrification drive aimed at bringing a stable electricity supply to thousands more.

The Rural and Renewable Energy Agency (RREA) and Rural Solar Incorporated have signed a grant agreement to bring electricity to underserved rural and last-mile communities across Liberia. The milestone initiative will connect 6,900 households in all 15 counties to enhance the quality of life and.

Monrovia, Liberia, May 24, 2024— After signing a grant agreement between the two institutions, over six thousand households in rural communities are expected to benefit from solar energy power from two firms: Rural and Renewable Energy Agency and Rural Solar Incorporated. The initiative will.

A key project the two companies are supporting is The Liberia Solar Home System Results-based Financing (LSHS-RBF) program. Jointly implemented by Energising Development (EnDev) and BRAC Liberia with funding from the Netherlands Government Directorate-General for International Cooperation (DGIS).

With the urgent need for rural electrification in Liberia, PratCo Energy Alliance, a Liberian-owned social enterprise with a decade of experience in sustainable development, expanded its program to include solar energy. Our innovative approach, combining micro-financing with community-led.

Hundreds of homes as well as clinics and schools in northern rural Liberia are set to be powered by solar mini-grids – part of a wider electrification drive aimed at bringing a stable electricity supply to thousands more. This week, two 26.88kWp combined capacity mini-grids were commissioned in.

We harness the most valuable resource in rural areas —tight-knit communities

— to provide life-changing products and services, starting with access to solar electricity. Electricity creates opportunities — opportunities to learn, communicate, start a business, and build a better life. Less than 1%.
