

ContainerPower Energy Solutions

South Asia small solar cell model

Overview

What is the Southeast Asia Solar supply chain map?

This edition of the Southeast Asia Solar Supply Chain Map provides a detailed snapshot of current realities and future ambitions, as the region navigates complex trade, investment, and production challenges.

What's new in the 2025 Southeast Asia Solar supply chain map?

The first 2025 edition of the Southeast Asia Solar Supply Chain Map includes significant revisions and additions, driven by valuable market feedback and the region's evolving geopolitical and industrial dynamics.

Is PV module manufacturing in Southeast Asia under pressure?

Thanks to new data, this edition includes entries such as ICA Solar and United Renewable Energy (URE), reflecting the evolving landscape of PV manufacturing in the region. Despite strong ambitions, PV module manufacturing in Southeast Asian is currently under pressure.

Does South Asia need solar power?

The UN acknowledges that energy is a crucial enabler for attaining SDGs (World Bank, 2016; Bukari et al., 2021b;), and despite South Asia's abundant solar resources, solar PV capacity in the region is underutilized.

Why is solar PV a pioneer variable in South Asia?

In this analysis, solar PV serves as the pioneer variable of query due to its role as the primary grid energy supplement in South Asia (Chernyakhovskiy, 2021) and its close association with small-scale farmers who often lack easy access to grid electricity .

Does South Asia need an energy transformation?

South Asia needs an energy transformation, shifting from scarcity to

abundance. Renewable energy, like solar home systems (SHS), can fuel both economic growth and agricultural development, tackling the dual challenge of limited resources and poor energy access [82, 80].
