# South Sudan s solar energy storage policy

## Overview

---

A public-private partnership in South Sudan has launched the country's first major solar power plant and Battery Energy Storage System (BESS) in the capital Juba, where it is expected to provide electricity to thousands of homes.

A public-private partnership in South Sudan has launched the country's first major solar power plant and Battery Energy Storage System (BESS) in the capital Juba, where it is expected to provide electricity to thousands of homes.

According to UC Berkeley's Renewable & Appropriate Energy Laboratory, reducing dependency on fossil fuels by increasing access to renewables could lower costs, improve public health and foster socio-economic stability in this conflict-affected country. Solar-powered refrigeration represents a

A public-private partnership in South Sudan has launched the country's first major solar power plant and Battery Energy Storage System (BESS) in the capital Juba, where it is expected to provide electricity to thousands of homes. This is a major step in reducing the country's electricity access.

While grid-connected solar power is the least-cost renewable energy option for South Tarawa and there is significant resource potential of 554 MW, deployment has been limited. How much power does South Tarawa need?

The photovoltaic systems account for 22% of installed capacity but supply only.

Offices in Juba, South Sudan have had a 50.144kWp solar installation with a 218kwh battery energy storage system commissioned recently. The roof-mounted system works alongside the city grid and a generator to run . a solar-plus-storage system to one of its humanitarian operations in South Sudan.

liable electricity for about 25 years. Having recognised solar energy potential, South Sudan is expected to put more emphasis on development of solar energy sector as part of its fight against energy transformation to South

Sudan's economy. For example, solar energy is affordable, cleaner and last.

ergy storage system (BESS) assets. Korean Electric Power Corporation (KEPCO) said last week (26 September) that a completion ceremony was held for what it claimed is Asia's nts to the additional challenges. Cui et al. [1], for example, describe the interactive effects of macroeconomic disruption.
