

ContainerPower Energy Solutions

Southeast Asian home yard solar integrated machine

Overview

Why is Southeast Asia a top exporter of solar power equipment?

In little over a decade, Southeast Asia has become one of the world's top exporters of solar power equipment – a success driven significantly by the relocation of Chinese manufacturers to the region. But now, the sector faces considerable challenges as US tariffs cut off their main export market, intensifying pressure on a previously booming trade.

Where do Southeast Asia's Solar Exports come from?

Southeast Asia's solar exports have primarily targeted the US, with more than 80% of the equipment it imported in the first half of 2024 sourced from Malaysia, Vietnam, Thailand and Cambodia, according to BloombergNEF. But this successful run is now under threat.

Why are Chinese solar companies moving to Southeast Asia?

Ever since finding themselves in the crosshairs of US import tariffs in 2012, Chinese solar manufacturers began shifting their production to Southeast Asia to circumvent trade barriers. More recently, overcapacity and brutal price wars in China's domestic market have accelerated these international relocations.

Can floating solar PV be used in Southeast Asia?

"The implementation of floating solar PV also complements the extensive use of hydropower in the region, as hydro reservoirs are the most conducive environment for floating PVs," Pheh adds. Not only do Southeast Asian renewables companies develop solar projects in the region, but also businesses from Europe.

Should Southeast Asian countries invest in solar power?

A worker inspects cables at a floating solar power project in Rayong, Thailand. Southeast Asian countries have welcomed investment to produce solar

equipment domestically, though this has largely been destined for export to the United States rather than supporting local capacity (Image: Wang Teng / Imago / Alamy).

What is the largest rooftop solar power project for Dong Anh chainsaw?

In June 2023, GreenYellow Vietnam, a subsidiary of French energy management company GreenYellow, announced to completion of a 750 KWp rooftop solar power project for Dong Anh Chainsaw. This project is the largest rooftop solar power project for GreenYellow Vietnam.
