Overview

According to a draft government report issued in June, Spain's goal is to raise the share of renewables to four-fifths by 2030. The new climate plan includes higher targets for solar and wind power capacity as well as energy storage.

According to a draft government report issued in June, Spain's goal is to raise the share of renewables to four-fifths by 2030. The new climate plan includes higher targets for solar and wind power capacity as well as energy storage.

In order to attain its newly expanded goal of having 62 GW of wind power and 81 GW of solar power installed by 2030, Spain will need to hasten its pace of renewables deployment and overcome obstacles: permitting bottlenecks, anemic growth in rooftop solar, and infrastructure limitations that impede.

Spain's Council of Ministers has approved a royal decree to promote energy storage, accelerate electrification, and tighten oversight of the national grid, says the Ministry for the Ecological Transition and Demographic Challenge (MITECO). From ESS News Spain's Council of Ministers has approved a.

Over half of Spain's electricity was generated from renewable energy in 2023, and a new government proposal sets a goal of 80 percent by 2030 at a cost of \$322 billion. Spain's new government goal to double wind capacity means it would need to almost triple wind installations from current annual.

This week, the Council of Ministers approved a new royal decree designed to strengthen grid resilience, promote energy storage, and streamline regulatory procedures for renewable and hybrid projects. The legislation, which integrates key elements of the earlier "Anti-Blackout Decree" (Royal.

Spain is leading Europe's clean energy push with major solar, wind, and green hydrogen projects. Explore how policy and investment are driving renewable growth. Spain has emerged as a powerhouse in Europe's renewable energy transition. With its abundant sunshine, consistent wind patterns, and.

The Spanish government has approved a royal decree aimed at strengthening the power grid's resilience, robustness and stability in response to the

nationwide blackout in April. Some of the measures passed in this latest royal decree were picked up from the previous one in June, which was ultimately.
