## Overview

---

The PS10 Solar Power Plant (Spanish: Planta Solar 10) is the world's first commercial concentrating solar power tower operating near Seville, in Andalusia, Spain. The 11 megawatt (MW) solar power tower produces electricity with 624 large movable mirrors called heliostats. It took four years to build and so far has cost €35 million (US\$46 million). PS10 produces about 23,400 megawatt-hour. OverviewThe Solucar Complex is a complex in , , used primarily for solar power generation. The complex includes: • •.

The first two power plants to be brought into operation at were the PS10, and Sevilla PV, the largest low concentration system photovoltaic plant in Europe. The plants in the complex are as follows.

The PS20 solar power plant (PS20) solar power plant is a plant in near in , Spain. It was the world's most powerful solar power tower until the
