---

What is a portable power supply?

Portable and compact Portable power supply is compact and lightweight design is perfect for indoor and outdoor activities. As an emergency power source backup at home for power outage If you are camping, it can as a light in the dark, charge your MP3, laptops, Kindle, Camera and so on.

How to choose a portable power supply?

Now, there is a lot to take into consideration when you are looking for a portable power supply. The battery type and battery capacity will determine how long your supply will run and how much it can charge. You also have to take into account for what type of wattage the supply is rated, since this will help to determine what you can power with it.

What is the best portable power supply?

After carefully researching all of the different options on the market today, we have concluded that the SUAOKI Portable Power Station is by far the best portable power supply out there. It comes with a multitude of charging ports and options, which means that if you have a device that needs to be charged, this unit will have you covered.

What features should you consider when buying a power supply?

These might include things like flashlights, hazard lights, battery indicators, and output meters. Two of the better extra features to keep in mind are an overheating protection system, as well as a surge protector. These two features will help to make sure that you power supply doesn't sustain any damage due to heavy use.

What types of outlets can a power supply accommodate?

The types of outlets that your power supply can accommodate are, once again, up to your personal preference. If you are only going to be charging a

laptop or just want to power a desk lamp, then you can get by with a few regular, AC plug-in outlets.

How long do portable power supplies last?

The batteries that are used in portable power supplies are usually lithium-ion batteries. Even if these batteries are not used constantly, they will still age. They do not have a terribly long lifespan. In fact, even if you barely use your power supply, the battery will probably only last you two to three years at full capacity.
