# Sweden s behind-the-meter energy storage cabinet policy

## Overview

---

Does Sweden have a battery energy storage system?

Sweden has traditionally lagged behind continental Europe in Battery Energy Storage Systems (BESS) growth, but recent developments have propelled rapid expansion. Until 2022, only a few projects were launched, mainly supported by subsidies and specific storage needs.

How many large-scale energy storage systems are there in Sweden?

The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh. This milestone investment represents a significant step toward Sweden's goal of achieving a carbon-neutral energy system.

Why should Sweden invest in energy storage?

"Sweden faces increasing electricity demand, which must be addressed by expanding carbon-free energy production, strengthening energy grids, and improving energy storage capabilities. It is an honor to inaugurate the largest energy storage investment in the Nordic region.

How many large-scale battery storage facilities are there in Sweden?

This initiative represents the deployment of 14 large-scale battery storage facilities with a total capacity of 211MW/211MWh - a historic investment and milestone in Sweden's transition towards a fossil-free energy system here and now.

Does Sweden need more energy?

" Sweden is facing a significantly increased demand for electricity, which must be addressed through a combination of increased fossil-free electricity production, stronger power grids and improved energy storage. It is a great honor to inaugurate the largest energy storage investment in the Nordics, with 211 MW now connected to the power grid.

How many energy storage facilities will Ingrid capacity build in Sweden?

Ingrid Capacity plans to build an additional 13 energy storage facilities in Sweden by the end of 2024, with a total capacity of 196 MW/196 MWh. By the second half of 2025, the company aims to have over 400 MW/400 MWh of flexible resources in the Swedish electricity grid.
