Will a phone charger work in Thailand without a voltage converter?

If it's within 100-240V, your charger will work in Thailand without a voltage converter. For travelers from Malaysia, Singapore, the UK, Australia, and the US, a plug adapter is needed to fit the local outlets, which are primarily Type A, B, C, F, and O. Phone chargers from these regions are usually dual-voltage, so they'll work with an adapter.

What voltage does Thailand use?

Unlike the U.S., and like most other countries – Thailand's electrical grid uses a frequency of 50 Hz and a voltage of 220V. What kind of power adapter do I need for Thailand?

A common question most travelers ask is, "What plug do I need for Thailand?"

Do I need a plug adapter in Thailand?

If you're from the UK, Australia, Singapore, or regions using Type G, I, or other plug types (like Type C, E, F, or D), you will need a Type A, B, C, F, or O plug adapter to fit outlets in Thailand. If you're from Malaysia, you may need a Type A, B, or C plug adapter as Malaysia uses Type G outlets, which differ from those in Thailand.

What types of power outlets are available in Thailand?

In reality, what you may encounter in Thailand are: Type A/B power outlets (often compatible with US devices– more on that below), Type C power outlets (compatible with some European devices), and occasionally the new Type O power outlets. Some "hybrid" power outlets built into walls in Thailand will allow all three of these plugs.

What type of plug does Thailand use?

Source: power plugs sockets Thailand uses five plug types: Type A, Type B, Type C, Type F, and Type O. In Thailand, the most common plug types are Type C and Type A, but the country also supports a variety of other plug types like Type B, Type F, and the uniquely Thai Type O.

Do power adapters work in Thailand?

These travel power adapters for Thailand will work all across the country, including Bangkok, Phuket, Chiang Mai, and many others. Can I buy power adapters when I get to Thailand if I need them?
