Thailand container new energy battery factory energy

Overview

Sunwoda Energy will build a battery factory in Thailand with an investment of THB 50 billion (approximately \$1.48 billion USD, at an exchange rate of 1 USD = 33.8 THB) and is set to start production later this year. Will Thailand build a battery cell factory in the next two years?

A person is optimistic that Thailand will establish significant battery cell factories within the next two years, contributing to the completion of the EV supply chain in the country. Currently, China dominates the global battery cell market, accounting for over 60% of the share, with CATL holding a 37% share.

Does Thailand need a battery energy storage system?

Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The 2024 PDP draft included 10,000 MW of BESS, but this may see the country struggle to fulfil carbon neutrality and Net Zero commitments over the coming decades.

Will Chinese battery manufacturer EVE Energy build a factory in Thailand?

Chinese battery cell manufacturer Eve Energy is planning a joint venture to build a factory in Thailand with an annual capacity of at least 6 gigawatt-hours. The joint venture for this is to be established together with the Thai energy company Energy Absolute. Energy Absolute is to hold 51 per cent of the joint venture and Eve Energy 49 per cent.

Why is EVE Energy planning a battery plant in Thailand?

The company has been planning battery plants in Thailand since at least 2018. For its part, the Chinese battery heavy-weight Eve Energy says the memorandum of understanding will help facilitate its overseas business advancement to support the needs of customers in Thailand and Southeast Asia.

How many mw can a solar generator store in Thailand?

Their total combined storage capacity was 994 MW. Interestingly, this allowed generators to sign semi-firm power purchase agreements (PPAs) with the Electricity Generating Authority of Thailand (EGAT) with minimum availability guarantees. Many solar projects in Thailand have non-firm PPAs in place due to a lack of storage on site.

Why is battery storage a problem in Thailand?

This is partly due to a lack of clarity on how battery storage fits into existing electricity infrastructure. In 2022, the Thai government approved 24 BESS projects, all of which were located alongside solar operations. Their total combined storage capacity was 994 MW.
