The best solar panel prices at the moment

Overview

This article provides information on the top five solar panel makers and their product lineups. It also gives tips for choosing the best solar panels for your home, including cost, efficiency rating, wattage o.

How much do solar panels cost?

Cost per watt (20 points): The cost of solar panels is one of the most important factors, as the price can range from \$2.50 per watt to well over \$3 per watt. Many homeowners consider the price of solar panels when doing their research, which is why we always include this data point in our methods.

Who makes the best solar panels?

Five brands stood out: Maxeon, VSUN, REC, Qcells, and Canadian Solar. What are the best solar panels?

Based on our analysis, Maxeon offers the best solar panels, followed by VSUN, REC, Qcells, and Canadian Solar. Each scored well overall, but the best one for you depends on your home's specific needs.

Are there cheaper solar panels on the market?

While there may technically be cheaper solar panels on the market, few can match the reliability and brand reputation of JA Solar. The combination of affordability and reliability makes JA Solar a compelling choice for homeowners looking for a cost-effective yet dependable home solar system.

Which solar panel should I buy?

Eagle Continental: This panel is my recommendation for the most affordable solar panel for homeowners on a budget. Its 19.8% efficiency rating is good, but not great, but its cost per watt, coming in at \$2.25, is hard to beat. Eagle G4: The Eagle G4 is a big step up from the Continental.

Why are solar panels so expensive?

Since 2010, the cost to install solar panels on a home has fallen by roughly

50%. Costs rose slightly from 2020-2023 largely due to supply chain tangles from the pandemic, and then fell again in 2024. Prices have ticked upward slightly in 2025 due to tariffs and a rush for solar before the 30% consumer solar tax credit expires on December 31, 2025.

What should you look for when buying cheap solar panels?

Here are the four main things to look for when shopping for cheap solar panels: Cost per watt: It's easy to get distracted by the total price of a solar system, but the number you should focus on is the cost per watt.
