

## ContainerPower Energy Solutions

# The cost of 40 kWh of energy storage

## Overview

---

According to BloombergNEF's Energy Storage Outlook 2025, global ESS costs average \$150-\$250 per kWh, depending on system scale and technology type. How much does energy storage cost?

Different places have different energy storage costs. China's average is \$101 per kWh. The US average is \$236 per kWh. Knowing the price of energy storage systems helps people plan for steady power. It also helps them handle money risks. As prices drop and technology gets better, people need to know what causes these changes.

How much does energy storage cost in 2022?

From 2022 to 2025, energy storage costs have gone down each year. In 2022, a home system cost about \$1,000 per kWh. In 2023, the price dropped to \$600 per kWh. By 2024, it was \$400 per kWh for many systems. In 2025, most people pay between \$200 and \$400 per kWh.

How much does energy storage cost in 2025?

In 2025, they are about \$200-\$400 per kWh. This is because of new lithium battery chemistries. Different places have different energy storage costs. China's average is \$101 per kWh. The US average is \$236 per kWh. Knowing the price of energy storage systems helps people plan for steady power. It also helps them handle money risks.

How much does a battery storage system cost?

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024.

How much does battery storage cost in 2025?

Battery storage prices have gone down a lot since 2010. In 2025, they are

about \$200–\$400 per kWh. This is because of new lithium battery chemistries. Different places have different energy storage costs. China's average is \$101 per kWh. The US average is \$236 per kWh. Knowing the price of energy storage systems helps people plan for steady power.

How much does a kWh battery cost?

A normal 11.4 kWh battery costs about \$9,041. Bigger systems, like a 100 kWh setup, can cost \$30,000 or more. In 2025, the cost per kWh is between \$200 and \$400. The price changes based on the technology and where you live. Lithium-ion batteries, like LFP and NMC, are the most common.
