The function of 5G base station power distribution box

Overview

What is a 5G base station?

At the same time, a large number of 5G base stations (BSs) are connected to distribution networks, which usually involve high power consumption and are equipped with backup energy storage, giving it significant demand response potential.

What is a distributed collaborative optimization approach for 5G base stations?

In this paper, a distributed collaborative optimization approach is proposed for power distribution and communication networks with 5G base stations. Firstly, the model of 5G base stations considering communication load demand migration and energy storage dynamic backup is established.

Are 5G base stations able to respond to demand?

5G base stations have experienced rapid growth, making their demand response capability non-negligible. However, the collaborative optimization of the distribution network and 5G base stations is challenging due to the complex coupling, competing interests, and information asymmetry among different stakeholders.

What is a collaborative optimal operation model of 5G base stations?

Afterward, a collaborative optimal operation model of power distribution and communication networks is designed to fully explore the operation flexibility of 5G base stations, and then an improved distributed algorithm based on the ADMM is developed to achieve the collaborative optimization equilibrium.

What is 5G BS energy storage capacity?

Energy storage, as a backup energy source for 5G BS, is needed to supply power to the BS in case of distribution network failure. As shown in Fig. 3, the 5G BS energy storage capacity can be divided into backup capacity and

dispatchable capacity .

How does 5G BS get power?

There are mainly two ways for BS to obtain its power supply: when the power distribution system is normal, 5G BS obtains power by connecting to the distribution network; when the power distribution system fails, the storage battery supplies power to the equipment and guarantees communication services of 5G BS.
