# Three energy storage projects in Italy

## Overview

---

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia.

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia.

The largest project, a 160 MW facility, will be built in the municipality of Tuscania. Italy's Ministry of the Environment and Energy Security (Mase) has issued final approvals for five new battery energy storage system (BESS) projects, paving the way for 361 MW of new capacity to be added to the.

Winning participants of the tender will receive fixed revenues over a 15-year contract for capacity made available to the grid. Italy broke new ground in energy storage with its very first battery storage auction, competitively awarding the full 10 gigawatt hours (GWh) of capacity put up for.

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia. This move underscores the country's growing commitment to grid resilience, energy.

BW ESS and ACL Energy have announced a major expansion of their partnership for the development of battery energy storage systems (BESS) in Italy. This joint effort, which began in February 2024 with three initial projects totaling 0.4 GW, has rapidly grown to encompass 14 projects, reaching a.

Milan-based battery storage developer ACL Energy has recently announced a joint venture partnership with large-scale operator BW ESS and Penso Power, a London-based developer of grid-scale battery storage assets, for developing storage projects in Italy. This joint venture marks the entry of BW ESS.

With solar and wind generation surpassing 40% of Italy's electricity mix in Q1 2025, the country faces a critical challenge. How do you keep the lights on

when the sun sets or winds calm?

The answer lies in 12 major energy storage initiatives reshaping Italy's grid infrastructure [3]. Italy's.
