

## ContainerPower Energy Solutions

# Tunisian energy storage solar panel manufacturer

## Overview

---

What are grid-connected solar PV systems in Tunisia?

Grid-connected solar PV systems are recent in Tunisia. Their installation started upon the issuance of Law No. 2009-7, which authorises self-production of electricity from renewable energy sources. Grid-connected solar PV has mainly been implemented through the Prosol électrique programme, initiated in May 2010 by ANME and STEG.

What is the productivity of PV solar systems in Tunisia?

With these favourable conditions, the productivity of PV solar systems in Tunisia is very high. According to IRENA's Global Atlas, annual electricity production by PV solar systems varies between 1 450 kWh per kilowatt-peak (kWp) in the northwest region and 1 830 kWh/kWp for systems installed in the extreme southeast region.

How much electricity does a solar system produce in Tunisia?

In other words, for every kilowatt-peak (kWp) of installed solar capacity, the system can generate approximately 1650 kilowatt-hours (kWh) of electricity per year. 2 As of March 2022, the price of electricity in Tunisia stood at \$0.07 per kilowatt hour (kWh) for households, making it an affordable option for residential consumers.

How much does electricity cost in Tunisia?

As of March 2022, the price of electricity in Tunisia stood at \$0.07 per kilowatt hour (kWh) for households, making it an affordable option for residential consumers. In contrast, businesses in Tunisia faced a slightly higher rate of \$0.10 per kWh, reflecting the differing energy demands and usage patterns between the two sectors. 3.

How much sunlight does Tunisia get per year?

There is an average of 2993 hours of sunlight per year. 1 Tunisia boasts an

impressive solar energy potential, with an average annual global horizontal irradiance (GHI) of approximately 1850 kWh/m<sup>2</sup>. This abundant solar resource translates to an average annual energy production of solar photovoltaic (PV) systems of around 1650 kWh/kWp/yr.
