Türkiye Energy Storage Equipment Procurement

Overview

With strategic manufacturing capabilities, competitive pricing, and a logistics network bridging Asia and Europe, Türkiye now plays a pivotal role in the export of solar panels, wind turbines, battery storage systems, and EV charging stations. Where can I find information about government procurement in Turkey?

The primary official source for Turkey government procurement is the Public Procurement Authority (PPA). The PPA provides information on all government tenders, including tender announcements, tender documents, and award notices. Additionally, the Ministry of Finance provides information on government procurement policies and procedures.

What is Turkey doing in energy storage?

Turkey is aligning with the global trend of grid-scale storage and smart grid applications in energy storage technology. Several projects are planned, leveraging Turkey's advantageous position in renewable energy resources.

Is Turkey establishing a market for large-scale energy storage?

The latest announcement is a big step towards establishing a market for large-scale energy storage in the country, Energy-Storage.news heard from Korkut Öztürkmen, board member at Aksa Energy, one of Turkey's largest independent power producers (IPPs).

What is the procurement law in Turkey?

The main procurement act in Turkey is the Public Procurement Law No. 4734. This law sets out the general principles and procedures for government procurement in Turkey.

Where is Turkey's first solar power plant located?

In 2018, Turkey's first large-scale battery plant was established in Manisa, integrated with a wind power station. During the following year, Turkey's first

grid-connected solar energy and storage facility came into operation in Konya, showcasing simultaneous solar energy generation and battery storage.

What type of energy does Türkiye generate?

Approximately 56% of Türkiye's electric power generation capacity consist of renewable energy, including hydroelectric, wind, solar, geothermal, and biomass power plants, making Türkiye the fifth-largest generator of renewable energy in Europe and the 11th largest in the world.
