

## ContainerPower Energy Solutions

# UK 400MWh energy storage project

## Overview

---

Firstway Energy has received planning approval for three BESS projects totaling 400 MW capacity across England, with all approvals secured on February 4, 2025. The largest of the three projects is a 200MW system at Mill Hey in Capenhurst, Cheshire, connecting to the Capenhurst.

Firstway Energy has received planning approval for three BESS projects totaling 400 MW capacity across England, with all approvals secured on February 4, 2025. The largest of the three projects is a 200MW system at Mill Hey in Capenhurst, Cheshire, connecting to the Capenhurst.

At 400MW/800MWh, the Eccles site demonstrates the increased scale of battery projects on the transmission network and the announcement brings Zenobé's live and contracted portfolio of projects in Scotland to 1.05GW, an over twentyfold increase since announcing its 50MW Wishaw project in East.

Three battery energy storage system (BESS) projects, at 200 MW, 100 MW, and 100 MW, were approved in a day for developer Firstway Energy Approved proposal for 100 MW storage at Illeybrook Farm, Illey Lane, Dudley. Firstway Energy has received planning approval for three BESS projects totaling 400.

Planning permission for a 200MW/400MWh, Battery Energy Storage System has been granted by Cumberland Council after the application was unanimously approved by the Council's planning committee. The project, jointly developed by Recurrent Energy and Windel Energy, will see the construction &.

Councillors in Dorset, UK have reportedly approved one of the largest BESS projects in the world, from developer Statera Energy. The company's 400MW/2,400MWh Chickerell battery energy storage system (BESS) project was voted in favour of by six votes to two this week (29 July) at a Dorset Council.

The 200MW/400MWh system will help grid operators manage supply-demand balancing, power stability, and network constraints. The site integrates offshore wind power, aiding the UK's goal of a net zero power grid by 2030.
