UK energy storage solar power generation project

Overview

European solar energy developer Cero Generation, alongside its UK development partner, Enso Energy, has announced it has secured approximately £200 million (USD 268.5 million) in green financing to advance a portfolio of co-located solar PV and battery energy storage system (BESS) projects across the UK, with the first project, Bramley, located in Hampshire, slated to begin construction in autumn 2025. Who owns the UK's largest co-located solar & battery storage project?

German energy group RWE AG (ETR:RWE) has secured planning permission for its Byers Gill solar plus storage project in the UK, marking the company's largest consented co-located solar and battery storage project in the country. Langford Solar Farm in Devon. (credit: RWE).

How many MW of solar & battery storage are there in the UK?

Combined, these projects represent 577 MW of solar capacity along with 105 MW of co-located battery storage. German energy group RWE AG (ETR:RWE) has secured planning permission for its Byers Gill solar plus storage project in the UK, marking the company's largest consented co-located solar and battery storage project in the country.

What is the UK's First Solar & Storage Project?

The PV project was the UK's first transmission-connected one, and with the addition of the BESS it will become the first solar and storage one too, Cero claims. It was co-developed with developer Enso Energy.

How is the UK's solar energy and battery storage sector changing?

Introduction The UK's solar energy and battery storage sector is undergoing a rapid transformation, bolstered by ambitious climate targets and supportive policies. Solar photovoltaics (PV) capacity has rebounded since the end of feed-in tariffs, while energy storage is scaling up to enhance grid reliability.

How many solar projects are there in the UK?

In the UK, RWE has 11 solar projects under construction and recently brought online its first UK solar site, Langford. Combined, these projects represent 577 MW of solar capacity along with 105 MW of co-located battery storage.

How many solar projects does RWE have in the UK?

RWE has 11 solar projects under construction in the UK and earlier this month marked the energisation of its first UK solar site, Langford. Together, these construction and operational projects total 577 MW (AC) alongside 105 MW (AC) of co-located battery storage. Pictures for media use (credit: RWE) are available at the RWE Media Centre.
