UK energy storage system prices

Overview

By 2025, the average cost of adding a solar battery to a house in the UK typically ranges from £3,000 to £10,000. Here, we take a 3-bedroom house as a detailed example. How is the UK's solar energy and battery storage sector changing?

Introduction The UK's solar energy and battery storage sector is undergoing a rapid transformation, bolstered by ambitious climate targets and supportive policies. Solar photovoltaics (PV) capacity has rebounded since the end of feed-in tariffs, while energy storage is scaling up to enhance grid reliability.

How much does a solar battery cost in the UK?

But with battery prices varying from £4,000 for an entry-level 4kWh right up to a whopping £12,000 for a 16kWh model, choosing the right system for your home is vital. Here, we break down the latest solar battery system costs in the UK and help you choose the correct size solar battery for your home's energy usage.

How much does a solar battery storage system cost?

The total cost to install a solar battery storage system, including a 4kWh battery, inverter and PV system, comes in at around £12,000 on average. How long will a 10kW home battery last?

The average solar battery storage system lasts around 10 to 15 years. This is provided it's properly installed and well-maintained.

Are solar battery storage systems becoming more in demand?

With energy prices rising, it's no wonder solar battery storage systems are becoming more in demand. Many homeowners are wising up to storing their excess solar energy, rather than it funnelling back to the grid.

What are solar battery storage systems?

Simply put, solar battery storage systems allow you to store electricity generated from the sun via your solar panels to use in the evening or at a later date. This allows you to use the electricity you generate, meaning you have less to buy from the grid. But the benefits don't end there. The latest solar battery storage systems also offer:

How much does a 10kW solar battery cost in the UK?

The average price of a 10kW solar battery in the UK is approximately £8,000. Are solar batteries worth the cost in 2025?

For larger properties, battery storage generally makes sound economic sense. However, for smaller homes, there are several factors to consider when determining whether it is economically viable.
