Vanuatu solar Panel Power Generation Project

Overview

Vanuatu has taken a major step forward with the launch of its largest solar farm, the Kawene Solar Farm—an ambitious initiative set to significantly reduce carbon emissions and bolster energy security across the island nation. What is a Vanuatu solar PV system?

This project is aligned to the Government of Vanuatu's National Energy Road Map for increasing the energy access for rural communities in Vanuatu. The installed solar PV system is a stand-alone 230/400 VAC 50Hz solar micro-grid combined with 48V batteries operating 24 hours and 7 days a week.

Will solar power boost Vanuatu's energy independence and climate resilience?

The project aims to support the use of solar power and battery storage on the islands of Efate and Tanna, boosting Vanuatu's energy independence and climate resilience. New Zealand's Deputy Prime Minister and Minister for Foreign Affairs, Winston Peters, confirmed the country's commitment during a press conference held in Port Vila on Wednesday.

How can Vanuatu benefit from solar power?

With this project, 17,000 households throughout Vanuatu will be supported to access non grid, renewable electricity through solar. With low population densities and large distances between communities, a key challenge for the project has been providing access to electricity in a way that is cost effective and efficient.

What is the Vanuatu energy road map?

This project has been implemented by the Ministry of Climate Change, with support from the United Nations Development Programme (UNDP) and funding from the Government of Austria This project is aligned to the Government of Vanuatu's National Energy Road Map for increasing the energy access for rural communities in Vanuatu.

Does Vanuatu have a Power Cooperative?

Throughout the first year of operation, the local energy service company will provide free maintenance and train members of the local communities to operate and maintain the power station. “This the first-ever power cooperative for Vanuatu’s last mile communities.

Will a new solar micro-grid change Vanuatu's future?

On the remote island of Malekula, a new solar micro-grid is changing the lives of over 2,800 people -- boosting local development while contributing to Vanuatu’s sector-specific target of transitioning to close to 100 percent renewable energy in the electricity sector by 2030.
