# Venezuela s new outdoor power supply

## Overview

---

The electricity sector in Venezuela is heavily dependent on hydroelectricity, which accounted for 64% of the nation's electricity generation in 2021. Besides hydroelectric power, Venezuela also relies on and , contributing 25% and 11%, respectively, to the total electricity output that year. The country operates six hydroelectric plants, totaling a capacity of 16,010 megawatts (MW), with the Central Hidroeléctrica Guri in being the most significant, acco.

The President of Venezuela, Nicolás Maduro, announced a plan to generate 3,000 megawatts of solar energy in the Venezuelan Andes, in collaboration with China, India, and Turkey.

The President of Venezuela, Nicolás Maduro, announced a plan to generate 3,000 megawatts of solar energy in the Venezuelan Andes, in collaboration with China, India, and Turkey.

Venezuela is currently grappling with an unprecedented power crisis that has pushed the country's infrastructure to breaking point. The situation stems primarily from the severe decline in hydroelectric generation capacity, which traditionally accounts for approximately 60% of Venezuela's.

The electricity sector in Venezuela is heavily dependent on hydroelectricity, with this energy source accounting for 64% of the country's electricity generation in 2021. [1] The country relies on six hydroelectric plants, with Central Hidroeléctrica Guri providing the majority of this capacity. In.

Venezuelan President Nicolás Maduro announced the creation of a new solar plant in the Venezuelan Andes, a region severely affected by power outages. During a meeting with the National Council of Productive Economy, which brought together the states of Mérida, Táchira, and Trujillo, Maduro detailed.
