Discover the innovators driving 82% of global solar deployment with breakthrough technologies and record installations. In 2025, Asian manufacturers have solidified their position as global solar powerhouses, controlling over 82% of worldwide module production. This leadership stems from continuous.

From utility-scale solar farms and offshore wind turbines to rooftop solar panels and small-scale hydroelectric projects, renewable energy solutions are being deployed at all scales to meet the diverse needs of communities worldwide. As costs continue to decline and innovation drives further.

China Three Gorges Corporation (CTG) is a state-owned Chinese power company founded in 1993 to lead the construction of the Three Gorges Dam, the world's largest hydroelectric power plant. Since completing the project, CTG has expanded into large-scale hydropower, wind, and solar development.

This report lists the top Asia-Pacific Solar Photovoltaic (PV) companies based on the 2023 & 2024 market share reports. Mordor Intelligence expert advisors conducted extensive research and identified these brands to be the leaders in the Asia-Pacific Solar Photovoltaic (PV) industry. Need More.

West, a major construction company for solar power generation in Japan, contributes to carbon neutrality through the spread of renewable energy in ASEAN countries (Thailand). WEST Group in Japan has accumulated the experience and knowledge as an expert of Total Energy Solution in 40 years

history.

According to Rystad Energy, the installed capacity of renewable energy in the Asia-Pacific region will be rising from 517 GW in 2020 to 815 GW by 2025, while Solar energy will lead this growth, whose regional capacity will nearly double from about 215 GW to 382 GW in the same period. As per Global.
