What are the new energy storage projects

Overview

One of the US's largest solar + battery storage projects is now fully online in Mojave, California.

One of the US's largest solar + battery storage projects is now fully online in Mojave, California.

One of the US's largest solar + battery storage projects is now fully online in Mojave, California. Arevon Energy's Eland Solar-plus-Storage Project combines 758 megawatts (MWdc) of solar with 300 MW/1,200 megawatt hours of battery storage. Eland 1 reached commercial operation in December 2024.

—became operational, collectively delivering 600 MW of solar power and 390 MW of storage. These projects now provide clean energy to approximately 270,000 powered vehicles from the roads or planting 6.5 million trees and growing them for 10 years demands on our grid," said Ted Bardacke, chief.

As Electrek reported, a record 5.6 gigawatts of new energy capacity was added in the second quarter of 2025. The American Clean Power Association and Wood Mackenzie released their US Energy Storage Monitor report, which shared this data based on comprehensive industry research. As detailed in the.

Following similar pieces the last two years, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in 2024. The industry has gone from strength to strength this year, with deployments continuing to break records and new markets opening up at scale all over.

This tracking includes all projects, plants, operations, or expansions that were cancelled or closed since passage of the IRA in August 2022. This does not include announced layoffs that are not associated with a project downsizing unless there is a stated decrease in production output. This list.
