We rated and reviewed the best solar-powered generators for home backup during power outages, including models from Generac, Jackery, and more.

We rated and reviewed the best solar-powered generators for home backup during power outages, including models from Generac, Jackery, and more.

Once considered overly expensive and underpowered, solar generators are getting more affordable and useful each year, so we put eight popular models to the test to see how well they could produce and store energy. After using them for everything from charging phones and tablets to running.

Solar generators can make your life a little easier on a good day or save you on a bad day. These powerful power packs offer huge battery capacity that can fuel large devices and even appliances in a pinch. They're great in an emergency, but they're also essential tailgating and camping equipment.

Solar generators are portable power stations that combine batteries with solar panels to provide electricity even in remote areas. Some also allow you to charge your battery via a power outlet or even a wind turbine. Solar generators are an emerging and ever-improving technology. EcoFlow was.

The best solar generator pairs a large-capacity rechargeable power station — a big battery, at heart — with a set of portable solar panels, making for a versatile device that can provide backup power for your home during an emergency and do double duty for off-grid activities like camping.

SolarReviews is the leading American website for consumer reviews and ratings of residential solar panels and solar panel installation companies. We're also a team of solar experts with decades of experience who want to educate people about all the ways that solar power can improve their lives. What are the best solar generators?

Top-rated models include the EF ECOFLOW Solar Generator DELTA 2 Max for all-around performance, the BLUETTI Portable Power Station AC180 and Anker SOLIX C1000 for compact portability, the Jackery Explorer 1000 v2 for

lightweight travel power, and the EF ECOFLOW Portable Power Station DELTA 2 for strong value and balanced capacity.

What are solar generators used for?

Solar generators are versatile and can be used in a variety of situations. Here's a quick breakdown of where they shine: Home Backup Power: Perfect for keeping essential appliances like refrigerators, lights, and medical devices running during power outages. Outdoor Adventures: Reliable power for camping, RV trips, or off-grid explorations.

What makes a good solar generator?

Solar generators need to keep the power coming in and going out. The best solar generators can simultaneously charge all your intended devices via whatever plugs are necessary. Any portable power station worth your money will have a high output capacity so you can charge many devices, even if they require a lot of juice.

What kind of battery does a solar generator use?

Most solar generators use lithium-ion batteries or the newer LiFePO4 batteries (which are even better because they last longer and handle more charge cycles). Battery capacity is measured in watt-hours (Wh) — for example, a 1000Wh battery can power a 100-watt device for about 10 hours. Batteries also have something called charge cycles.

Should you buy a solar generator?

Product news, reviews, and must-have deals. Solar generators can make your life a little easier on a good day or save you on a bad day. These powerful power packs offer huge battery capacity that can fuel large devices and even appliances in a pinch. They're great in an emergency, but they're also essential tailgating and camping equipment.

Where can I buy a solar generator?

The North American branch operates from Oxnard, California. While you can get a solar generator starting at \$500 here, the best-selling generator at Nature's Generator is actually \$899, and it's the Nature's Generator Elite.
