What energy and gas filling stations are there in Syria

Overview

In 2021, only oil accounted for 68.2% of Syria's total energy supply. Natural gas accounted for 30.9% and Water energy(hydro) accounted for 0.7%. From 2000 to 2021, 22 Metric tons of CO₂ has been emitted, which contributes to 0.07% of total energy emissions and a 41% decrease in CO₂ emissions. Electricity consumption per capita has decreased by 43% between this period, with a 4.5% share of power generation on renewables in 2021 alone.

What type of energy is used in Syria?

Energy in Syria is mostly based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. There is high reliance on fossil fuels for energy in Syria, and electricity demand is projected to increase by 2030, especially for industry activity such as automation.

How much energy does Syria produce in 2021?

In 2021, only oil accounted for 68.2% of Syria's total energy supply. Natural gas accounted for 30.9% and Water energy (hydro) accounted for 0.7%. From 2000 to 2021, 22 Metric tons of CO₂ has been emitted, which contributes to 0.07% of total energy emissions and a 41% decrease in CO₂ emissions.

Is solar energy a viable source of energy in Syria?

Some households have since turned to solar energy as a supplementary source of energy, though high costs limit widespread adoption. In 2021, only oil accounted for 68.2% of Syria's total energy supply. Natural gas accounted for 30.9% and Water energy (hydro) accounted for 0.7%.

How much natural gas does Syria have?

Natural gas In 2015, the EIA estimated Syria's natural gas reserves at 240 billion cubic meters (BCM). Syria possesses both wet and dry gas. Syria's natural gas is used for power production and is needed for reinjection into Syria's oil fields.

What is the outlook for Syria's Energy Resources & Infrastructure?

A quick outlook regarding Syria's energy resources and infrastructure, including the role of declining oil revenue under the Assad regime's governance and the prospects for, and geopolitical impact of, Syrian energy production and trade in a new era.

How many kilowatthours of electricity does Syria generate?

In 2010, Syria generated almost 44 billion kilowatthours of electricity, 94% of which came from conventional thermal power plants. The remaining 6% came from hydroelectric power plants. Refined petroleum products and natural gas fuel Syria's thermal generating facilities.
