The East River Battery Energy Storage System (BESS) project consists of a new, 100MW generating station utilizing 110 Tesla 2XL Megapacks to provide 100MW of clean power and 400MW hours connecting to the grid through the adjacent Con Edison West Astoria Switching Station. The project scope includes.

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once.

Consolidated Edison Inc. (ConEd) and 174 Power Global are set to move forward with the East River Energy Storage Project, a 100 MW battery storage system in New York City, after the state Public Service Commission (PSC) gave recent approval for the project. Irvine, CA-headquartered 174 Power.

In 2019, New York passed the nation-leading Climate Leadership and Community Protection Act (Climate Act), which codified aggressive climate and energy goals, including the deployment of 1,500 MW of energy storage by 2025, and 3,000 MW by 2030. Over \$350 million in New York State incentives have.
