What is the price of 10kw solar panels

Overview

How much do solar panels cost in 2025?

Take control of your energy costs with solar power. Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025.

How much do solar panels cost in 2025?

Take control of your energy costs with solar power. Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025.

On average, a 10 kW solar panel system costs \$25,400, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. The table below should give you an idea of what you can expect to pay for a 10 kW solar panel system in your state.

On average, a 10 kW solar system will cost \$30,000 before the federal solar tax credit. 10 kW of solar panels can generate enough electricity to cover a \$160 electricity bill. Depending on where you live, you can expect the system to produce between 11,000 and 15,000 kWh of electricity every year!.

Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs.

To directly answer your question, the cost of purchasing the materials for a 10kW solar power system can range from US\$9,900 to US\$14,800, excluding installation and permitting costs. This price range reflects the cost of a good-quality system of this size.
