This article lists the main power stations in Albania. There were 144 active power stations operating in the country in 2016. [1] The table below lists only stations that have at least 10 MW of power capacity. As of 2022, there were 16 solar projects totaling 570 MW planned in Albania. [2] ^.

Albania is a net importer of electricity; power supply security is a challenge. Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable. The total installed generation capacity has increased over the last few.

Albania has 8 utility-scale power plants in operation, with a total capacity of 1529.0 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth Data.

Hydropower is the second largest contributor to Albania's primary energy supply, after fossil fuels, and accounts for almost entirely the country's electricity generation. ENERGY STRATEGY FOR ALBANIA (2017-2030) VISION for 2030 Development of domestic energy sources, leading to a regional.

The AEA Albania Energy Association was established in 2011 as not-for-profit industry association to represent Albanian and international energy producers, consumers and promote the use of sustainable energy in Albania and West Balkan. info@aea-al.org .
