There are many reasons to supply electricity to a container, especially in off-grid settings. Common scenarios include: Remote work sites: Construction sites, mining camps and telecom towers often use containers as mobile offices or equipment rooms. These locations typically lack nearby utility.

MOBIPower containers are purpose-built for projects where energy demands go beyond what a trailer can deliver. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client.

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs. Our.

Our robust power solutions deliver efficient, sustainable power to support data centers, microgrids, healthcare, and more. At Cummins, we design, build, and test each component to consistently deliver state-of-the-art performance and

power. Global industries need global support. From mining, rail.

Numar Shipping, LLC is committed to leading the clean energy transition by making nuclear power more accessible, adaptable, and mobile. We believe in a world where energy is abundant, independent of location, and built for resilience in the face of global challenges. Welcome to numarshipping.com!
