Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

What are the best portable power stations?

The portable power stations that stood out above the rest were the Jackery Explorer 2000 Plus, the DJI Power 1000, the Vtoman FlashSpeed 1500, and the Oupes Mega 1. Portable power stations were tested for power use over time, measured in watt-hours (the total amount of energy used or produced).

Which battery is best for a portable power station?

These days most portable power stations, including all those we recommend here, use LiFePO4 batteries, which are capable of holding far more cycles, which is the number of times a battery goes through a complete discharge and recharge, than older lithium-ion batteries while also being less likely to combust.

What is a portable power station?

Portable power stations are large batteries in protective boxes, with AC outlets and other charging ports built in.

Which portable power stations have higher watt-hours compared to time charged?

To best understand our data visualizations, the power stations that had higher watt-hours compared to time charged were the top performers. This means that for portable power stations to charge to 100% (Figure 1), the top performers were the Jackery Explorer 2000 Plus and the Vtoman Flashspeed 1500.

How much power does a portable power station hold?

On the small end, portable power stations hold around 300 Wh (like the little EcoFlow River 3 Plus, our Best Budget pick). These little ones are generally smaller than a lunchbox and good for tasks like recharging laptops and speakers, LED lighting, and small fans.
