

## ContainerPower Energy Solutions

# Who provides the energy storage system for the Philippines communication base stations

## Overview

---

PKNERGY designed a solar + energy storage system based on the base station's requirements, with the following configuration: Is battery energy storage system the key to a more energy-secure Philippines?

MANILA – President Ferdinand R. Marcos Jr. on Friday said the Battery Energy Storage System (BESS) would become a crucial part of the government formula toward a more energy-secure Philippines. During the inauguration of the San Miguel Corporation's (SMC) BESS in Limay, Bataan, Marcos said the.

What is Masinloc battery energy storage?

We started our venture into battery energy storage technology in 2018 when we acquired the 10 MW Masinloc Battery Energy Storage System (BESS) of the Masinloc Power Plant from AES Philippines. The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia.

Is technology a solution to the Philippines' most pressing energy problem?

Ang said the solution that the country needs to help address its most pressing energy concern is already at its doorstep, noting technology represents a major step towards meeting the Philippine socio-economic goal sustainably. Legislation, more investments eyed to support BESS.

How can base load power plants benefit Filipino consumers?

Ang explained that with a significant portion of peak supply provided by BESS, existing base load power plants can run continuously and operate more efficiently, resorting to lower electricity rates for Filipino consumers.

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid

reliability and the integration of more renewable power sources to the country's diverse energy mix.

Does the Philippines have a strong energy supply?

A significant amount of the Philippines' primary energy supply is still fossil fuel-based, making the country vulnerable to rising energy costs and market volatility while the energy production is at the same time CO2 intensive.
