Wind power storage in northern France

Overview

In 2021 reached a total of 18,676 megawatts (MW) installed capacity placing France at that time as the world's seventh largest wind power nation by installed capacity, behind the and and ahead of and . According to the the yearly wind production was 20.2 TWh in 2015, representing almost 23% of the 88.4 TWh from in.

How is wind energy generated in France?

Wind energy is generated from the conversion of kinetic energy from wind turbines into electricity. Wind power was one of the leading electricity sources in France, with over 50 terawatt-hours generated in 2023, placing France among the most important wind power producers in the European Union.

What is the largest offshore wind farm in France?

Saint-Nazaire Offshore Wind Farm: Located off the coast of Brittany, this facility has a capacity of 480 MW, making it one of the largest offshore wind farms in France. Fécamp Offshore Wind Farm: Another significant project, with a capacity of 498 MW, situated in the Normandy region.

How many offshore wind farms will France build in 2024?

In 2019, Emmanuel Macron confirmed France's pledge to add 1 GW offshore wind every year between 2020 and 2024 as laid out in France's new draft energy plan (PPE). In February 2022, French President Emmanuel Macron announced that France was to build 50 offshore wind farms with a combined capacity of at least 40 GW by 2050.

How well developed is the wind power sector in France?

nte-nance.The wind power sector is well developed in France, with many companies located throughout the territory at all levels of the value chain (planning and de-sign, component manufacturing, engineering and construction and operation and ma.

How many people work in wind energy in France?

Wind energy in France is a major source of job creation, but these numbers are not just statistics; they reflect the growing skillset of a highly qualified local workforce. More than 31,000 people currently work in the industry, a number which is expected to exceed 40,000 by 2030.

How much wind energy does France have in 2022?

As of 2022, France boasts an installed wind energy capacity of around 18,000 MW. This impressive growth highlights the country's dedication to expanding its renewable energy portfolio. France is home to several notable wind farms that contribute significantly to its energy mix:
